Table of Contents

Section 1	Classification and Certification of Diving Systems and Diving Simulators	
A.	Scope of Application	1- 1
B.	Classification and Characters of Classification	1- 1
C.	Classification of Diving Systems Built or Converted under the Survey of and in Accordance with the Rules of GL	1- 2
D.	Classification of Diving Systems not Built under the Survey of GL	1- 3
E.	Surveys for Maintenance of Class	1- 3
F.	Surveys other than for Classification	1- 5
G.	Certification	1- 6
H.	Workmanship	1- 6
Section 2	Rules for Construction of Diving Systems	
A.	General Principles	2- 1
B.	Rules and Regulations to be Considered	2- 1
C.	Definitions	2- 1
D.	Environmental Conditions	2- 3
E.	Documents for Approval	2- 5
F.	Failure Modes and Effects Analysis (FMEA)	2- 7
G.	Tests and Trials	2- 9
H.	Marking	2-12
I.	Principles for the Design and Construction of Diving Systems	2-13
J.	Vessels and Apparatus under Pressure	2-14
K.	Pipes, Valves, Fittings, Hoses, Umbilicals	2-20
L.	Compressors	2-23
M.	Life Support Systems	2-24
N.	Electrical Equipment	2-27
O.	Automation, Communication and Locating Equipment	2-35
P.	Fire Protection	2-39
Q.	Launch, Recovery, Transfer and Mating Systems	2-41
R.	Hyperbaric Evacuation System	2-44
S.	Wet Bells	2-46
Section 3	Rules for Construction of Diving Simulators	
A.	General Rules and Instructions	3- 1
B.	Principles of Design and Construction of Diving Simulators	3- 6
C.	Vessels and Apparatus under Pressure	3- 7
D.	Pipes, Valves, Fittings, Hoses, Umbilicals	3- 9
E.	Compressors	3- 9
F.	Life Support Systems	3- 9
G.	Electrical Installations	3-12
H.	Automation Equipment and Communications Equipment	3-13
I.	Fire Protection	3-14
J.	Hyperbaric Evacuation System	3-15

Section 4	Rules for Construction of Diver Pressure Chambers	
A.	General Rules and Instructions	4- 1
B.	Principles for Design and Construction	4- 3
Annex A	Calculation of the Pressure Hull	
A.	General	A- 1
B.	Fatigue Strength	A- 1
C.	Stresses at Nominal Diving Pressure	A- 2
D.	Stresses at Test Diving Pressure	A- 2
E.	Proof of Ultimate Strength at Collapse Diving Pressure	A- 2
F.	Calculation	A- 2
G.	Literature	A-17
Annex B	Manufacturing Tolerances for the Pressure Hull	
A.	General	B- 1
B.	Dimensions of the Pressure Hull	B- 1
C.	Pressure Hull Frames	B- 2
D.	Out-of-Roundness of the Cylindrical resp. Conical Pressure Hull	B- 3
E.	Spherical Shells and Dished Ends	B- 6
F.	Literature	B- 8
Annex C	Acrylic Windows	
A.	General	C- 1
B.	Materials	C- 1
C.	Manufacture of Windows	C- 2
D.	Window Shapes and Sizes	C- 2
E.	Installation of Windows	C- 3
Annex D	Manufacture and Treatment of Fibre Reinforced Plastics (FRP)	
A.	General	D- 1
B.	Requirements for the Materials and their Processing	D- 1
C.	Requirements for the Design	D- 2
Annex E	Basic Requirements for Umbilicals	
A.	General	E- 1
B.	Principles for Layout and Design	E- 1
C.	Documents for Approval	E- 4
D.	Tests and Trials	E- 5
E.	Marking	E- 6

Index

A

Access openings	3-8
Acrylic windows	3-9, C-1
limits of application	C-1
mechanical and optical properties	C-3
standard dimensions	C-4
Analyzer systems	2-27
Asymmetric interstiffener buckling of the shell	A-5
Automation equipment	2-6, 2-10, 2-36, 3-13

B

Batteries	2-31
Batteries, lead	2-31
Battery chargers	2-31
Boat part of the evacuation system	2-45
Bolts and nuts	2-17
Breathing gases	2-24, 2-47
Bulkheads	2-15

C

Cables	2-33, E-3, E-6
Calculation of the pressure hull	A-1
Calculations	2-19, 2-42, 3-9, 4-6
Central control position	2-35, 2-47, 3-13
Certification	1-6
Chamber equipment	2-14, 3-6
Chamber facilities	3-6
Chambers conditions	2-13
Circuitry	2-37
Class Certificate	1-1
Class register	1-1
Class, admission to	1-3
Classification	1-1
built under the survey of and in accordance with the Rules of GL	1-2
not built under the survey of GL	1-3
Climate	2-4
Collapse diving pressure CDP	A-12

Communication equipment	2-38, 3-13
Communications	2-45, 4-5, 4-6
Component thickness	B-1
Compressed air supply	4-4, 4-6
Compressors	2-10, 2-23, 3-5, 3-9, 4-2
Conditioning of chamber atmosphere	3-11
Conical part of pressure hull, dimensions	B-1
Control equipment	2-27, 3-12
Control, communications and safety equipment	4-2
Controls	4-5, 4-6
Conventions and codes, international	2-1
Corrosion protection	2-14, 3-7
Currents	2-4
Cylindrical part of pressure hull, dimensions	B-1

D

Deck transport	2-7, 2-11, 2-43
Decompression chamber	2-10, 3-12
Decompression chambers	2-2, 2-38, 2-40, 3-7
Definitions	2-1, 3-1, 4-1
Design service life for acrylic windows	C-1
Discontinuities	A-14
Dished ends	A-12, B-6
dimensions	B-1
torispherical resp. semi-elliptical shape	B-6
Diver basket	2-2, 2-47
Diver pressure chambers	1-1, 4-1, 4-2, 4-3
Diving bell	2-2
Diving bells	2-11, 2-15, 2-25, 2-35, 2-41, 3-8, 3-15
Diving simulators	1-1, 3-1
Diving simulators components	3-2
Diving systems	1-1, 2-1
Diving systems components	2-3
Diving systems total system	2-5
Documents for approval	2-5, 3-2, 4-1
Doors	3-8
Ductility	2-16
Duration of Class	1-2

E

Earthing	2-28
Edge offset	B-1
Elastic-plastic range of the material	A-1
Electrical connecting elements	E-4
Electrical equipment	2-6, 2-10, 2-45, 3-3, 3-5, 3-12, 4-2, 4-5
Electrical Equipment	2-27
Electrical machines	2-34
Electrical penetrations in chamber walls	2-33
Emergency locating equipment	2-38
Emergency power supply	2-30
Emergency shut-off	2-36
Enclosures for electrical equipment	2-33
Environmental conditions	2-3, 3-2
Evacuation systems	2-44
Explosion endangered zones	2-5

F

Failure Modes and Effects Analysis (FMEA)	2-7
Fatigue strength	A-1
Fibre reinforced plastics	D-1
manufacturing	D-1
repair of components	D-2
requirements for the Design	D-2
requirements for the materials and their processing	D-1
scope of application	D-1
Fibres ropes	2-43
Filling stations	2-24, 3-9
Fire and explosion protection	2-44
Fire detection systems	2-40, 3-14
Fire extinguishing equipment	2-40, 3-14
Fire protection	2-6, 2-11, 3-4, 3-5, 3-14, 4-2, 4-5
Fire Protection	2-39
Fire surveillance	2-40, 3-14
Frames	A-8, A-11
arranged outside	A-12
imperfections	A-9
of pressure hull	B-2
tolerances	B-3

tripping A-9

G

Gas cylinders 2-2, 2-12

Gas distribution 2-25, 3-10

Gas storage 2-2, 2-24, 3-10

Gas supply 2-5, 2-24, 3-3, 3-10

H

Hoses 2-21

Hydraulic systems 2-22

Hyperbaric evacuation system 2-2, 2-7, 2-11, 3-1, 3-4, 3-5, 3-15

Hyperbaric evacuation systems 2-44

I

Impact energy 2-16

Inclined positions 2-4

indicating instruments 4-6

Indicating instruments 2-26, 4-5

Interior lighting 2-34

L

Launch and recovery systems 2-6, 2-11, 2-13, 2-41

Launch and recovery systems 2-46

Launch, recovery and transfer system 2-1

Launching 2-47

Life support systems 2-2, 2-6, 2-11, 2-24, 3-3, 3-5, 3-9

Literature A-17

Living compartment 2-2, 2-14, 2-25

Locating equipment 2-6, 2-10, 2-35

M

Main dimensions and main parameters 2-2

Manufacture 4-6

Manufacturing documents 1-7

Manufacturing tolerances for the pressure hull B-1

Marking 2-12, 2-23, 2-45, 3-5, C-1, C-2, E-6

Materials 2-15, 2-22, 2-23, 2-27, 2-42, 3-9, 4-6, C-1

Mating systems 2-1, 2-7, 2-11, 2-44, 2-46, 4-3

N

Non-destructive tests 2-16

O

Operating voltages	2-28
Operational media	2-22
Operational records	1-1
Out-of roundness of the cylindrical resp. conical pressure hull	B-3
Out-of-roundness	
Measuring method 1	
direct measuring of radii	B-4
non-uniformly distributed measuring points	B-5
Measuring method 2	
indirect measurement of the deviation from the average arc height	B-5
Oxygen supply	4-4
Oxygen systems	2-22

P

Penetrations in the cylindrical or conical part of the pressure hull	
area comparison principle	A-14
big penetrations interrupting frames	A-16
sectional area substitution principle	A-15
small penetrations which do not interrupt frames	A-15
Penetrations of spherical shells	A-17
Pipe classes	2-21
Pipes, Valves, Fittings, Hoses, Umbilicals	2-20, 3-9
Piping systems	2-10, 2-21, 4-2
Potential equalizing	2-28
Power distribution	2-32
Power supply	2-30, 2-37
Pressure chamber	2-44
Pressure chambers	2-2, 2-12, 2-14, 2-25, 3-6, 3-11, 3-15
Pressure hull	
conical part, dimensions	B-1
cylindrical part, dimensions	B-1
frames	B-2
Pressure vessel	A-1
Pressure vessels, gas cylinders and apparatus under external pressure	2-20, 3-9
Pressure vessels, gas cylinders and apparatus under internal pressure	2-20, 3-9
Protective conductors	2-28, 2-29
Protective measures	2-28

Q

Quality characteristics	2-16
Quality control	1-6

R

Recovery systems	2-47
Reduction factor "k" for different kinds of steel treatment	A-14
Routine test	2-34
Rules of GL	2-1

S

Safety factors	2-20
Scope of application	1-1
Screws and bolts	2-19
Seaways	2-4
Shaking	2-4
Spherical form, permissible	B-6
Spherical shells	A-12, B-6
dimensions	B-1
failure pressure with a deviating out-of-roundness	B-7
measurement of the local flattening	B-7
of ferritic steel	A-13
of other materials	A-13
Standard dimensions	
for flat disk windows	C-4
for spherical shell windows	C-5
Steel wire ropes	2-43
Stowage	2-7, 2-11, 2-43
Stresses	
at nominal diving pressure NDP	A-2
at test diving pressure TDP	A-2
for a conical pressure hull	A-5
in a uniformly stiffened cylinder	A-2
Stress-strain behaviour	A-7
Supervision during construction	1-2
Supply systems	2-28
Support ship	2-2
Surveys annual	1-4
Surveys class renewal	1-5
Surveys damage	1-5

Surveys extraordinary	1-5
Surveys intermediate	1-4
Surveys maintenance of Class	1-3
Surveys other than for Classification	1-5
Symmetric interstiffener buckling of the shell	A-6
System certificate	3-1
System Certificate	1-6

T

Tapping code	2-39
Test chamber	3-1
Test chambers	3-8, 3-11
Tests	2-9, 2-37, 3-4, 4-2
Tide	2-4
Transponder	2-38
Treatment chambers	4-4
Trials	2-9, 3-4, 4-2

U

Ultimate strength	A-2
Umbilicals	2-2, 2-22
coil-up/coil-off mechanism	E-4
documents for approval	E-4
energy supply lines	E-3
jettisoning	E-4
marking	E-6
principles for layout and design	E-1
tests	E-5
Underwater plug connections	2-33

V

Vessels and apparatus under pressure	2-5, 2-9, 2-14, 4-1, 4-2
Vibrations	2-4
Video surveillance equipment	2-38

W

Water	2-4
Web frames	A-7, A-8, A-12
Weld sinkage	B-1
Welding	2-17
Welding seams, evaluation	B-2

Wet bells	2-2, 2-7, 2-12, 2-36, 2-46
Wet chamber	3-1
Wet chambers	3-8
Window	
installation	C-3
manufacturing	C-2
shapes	C-2
Windows	2-10, 3-5, 3-9, 4-2
Workmanship	1-6
