*Common Structural Rules
for Bulk Carriers*

COMMON STRUCTURAL RULES FOR BULK CARRIERS

These Rules enter into force on 1st April 2006.

The Rules contain structural requirements for the Classification of Bulk Carriers of 90 m in length or greater.

The Rules contain thirteen chapters.

„General Terms and Conditions“ of the respective latest edition will be applicable
(see Rules for Classification and Construction, I – Ship Technology, Part 0 – Classification and Surveys).

Copyright in these Common Structural Rules is owned by each IACS member as at 15 January 2006.

Table of Contents

Chapter 1 - General principles

- Section 1 - Application
- Section 2 - Verification of compliance
- Section 3 - Functional requirements
- Section 4 - Symbols and definitions

Chapter 2 - General arrangement design

- Section 1 - Subdivision arrangement
- Section 2 - Compartment arrangement
- Section 3 - Access arrangement

Chapter 3 - Structural design principles

- Section 1 - Material
- Section 2 - Net scantling approach
- Section 3 - Corrosion additions
- Section 4 - Limit states
- Section 5 - Corrosion protection
- Section 6 - Structural arrangement principles

Chapter 4 - Design loads

- Section 1 - General
- Section 2 - Ship motions and accelerations
- Section 3 - Hull girder loads
- Section 4 - Load cases
- Section 5 - External pressures
- Section 6 - Internal pressures and forces
- Section 7 - Loading conditions
- Section 8 - Loading manual & Loading instrument
- Appendix 1 - Hold mass curves
- Appendix 2 - Standard loading conditions for direct strength analysis
- Appendix 3 - Standard loading conditions for fatigue strength assessment

Chapter 5 - Hull girder strength

- Section 1 - Yielding check
- Section 2 - Ultimate strength check
- Appendix 1 - Hull girder ultimate strength

Chapter 6 - Hull scantlings

Section 1 - Plating

Section 2 - Ordinary stiffeners

Section 3 - Buckling & ultimate strength of ordinary stiffeners and stiffened panels

Section 4 - Primary supporting members

Appendix 1 – Buckling & ultimate strength

Chapter 7 - Direct strength analysis

Section 1 - Direct strength assessment of the primary supporting members

Section 2 - Global strength FE analysis of cargo hold structure

Section 3- Detailed stress assessment

Section 4- Hot spot stress analysis for fatigue strength assessment

Appendix 1 - Longitudinal extent of the finite element models

Appendix 2 – Displacement based buckling assessment in finite element analysis

Chapter 8 - Fatigue check of structural details

Section 1 - General consideration

Section 2 - Fatigue strength assessment

Section 3 - Stress assessment of primary members

Section 4 - Stress assessment of stiffeners

Section 5 - Stress assessment of hatch corners

Appendix 1 – Cross sectional properties for torsion

Chapter 9 - Other structures

Section 1 - Fore part

Section 2 - Aft part

Section 3 - Machinery spaces

Section 4 - Superstructures and deckhouses

Section 5 - Hatch covers

Section 6 - Arrangement of hull and superstructure openings

Chapter 10 - Hull outfitting

Section 1 - Rudder and manoeuvring arrangements

Section 2 - Bulwarks and guard rails

Section 3 - Equipment

Chapter 11 - Construction and testing

Section 1 - Construction

Section 2 - Welding

Section 3 - Testing of compartments

Chapter 12 - Additional Class Notations

Section 1 - GRAB additional Class notation

Chapter 13 – Ships in Operation, Renewal Criteria

Section 1 - Maintenance of Class

Section 2 - Thickness measurements and acceptance criteria
